Update prices for multiple marketplaces

Learn how to update prices across multiple marketplaces in a single request with the `PATCH` operation.

Learn how to update prices across multiple marketplaces in a single request using the `PATCH` replace operation with the `purchasable_offer` attribute. This approach streamlines price management across regions and reduces API calls for pricing updates. You can specify different marketplaces using the `marketplace_id` parameter within each offer object.

Note

To granularly update or delete individual sub-attributes of `purchasable_offer` for a single marketplace (such as `discounted_price`, `map_price`, `start_at`, or `end_at`), refer to [Manage purchasable offer](#).

Prerequisites

To complete this tutorial, you need:

- Authorization from the selling partner for whom you are making calls. Refer to [Authorizing Selling Partner API Applications](#) for more information.
- Approval for the Product Listing role in your developer profile.
- The Product Listing role selected in the App registration page for your application.

Update prices for multiple marketplaces

- A JSON-based listing payload adhering to the JSON Schema provided by the [Selling Partner API for Product Type Definitions](#) for the given selling partner, Amazon marketplace, and Amazon product type.

 Note

Multi-marketplace functionality supports only `PATCH` operations within the same region (North America, Europe, or Far East).

Multi-marketplace `patchListingsItem` request for B2C purchasable offer

Sample request to update prices for UK (GBP) and Germany (EUR) marketplaces:

JSON

```
{
  "productType": "PRODUCT",
  "patches": [
    {
      "op": "replace",
      "path":
"/attributes/purchasable_offer",
      "value": [
        {
          "marketplace_id":
"A1F83G8C2AR07P",
          "currency": "GBP",
          "audience": "ALL",
          "our_price": [
            {
              "schedule": [
                {
                  "value_with_tax":
111.11
                }
              ]
            }
          ],
          "minimum_seller_allowed_price": [
            {
              "schedule": [
                {
                  "value_with_tax":
100
                }
              ]
            }
          ],
          "maximum_seller_allowed_price": [
            {
```

Performance Management

Note

The multi-marketplace PATCH operation also supports IVP (Industry Vertical Pricing) audience values such as B2B_EDUCATION. Use the purchasable_offer with the IVP audience value in the audience field. For more details on IVP audiences, refer to [Multiple offers with B2B Industry Vertical Pricing \(IVP\)](#).

JSON_LISTINGS_FEED**payload for multiple North American marketplaces**

Sample request to update prices for US, Canada, and Mexico marketplaces in a single feed:

```

JSON
{
  "header": {
    "sellerId": "****",

```

SECURITY AND COMPLIANCE

SP-API Security and Compliance Overview

Amazon Selling Partner API Guard Implementation Guide

>

Operation type	Multi-Marketplace support	Note
PATCH	Supported	Supports only purchasable_offer attributes. Fails for non_purchasable_offer attributes
DELETE	Supported	Supported across multiple marketplaces.
UPDATE	Not supported	Returns a feed-level error if attempted with multiple marketplaces
PARTIAL_UPDATE	Not supported	Returns a feed-level error if attempted with multiple marketplaces

VAT Calculation Service

Amazon Seller Data Access

Best Practices

>

Use the replace operation for PATCH requests when you update the purchasable_offer attribute. Ensure that:

- All marketplace IDs belong to the same region.
- Currency codes match each marketplace's requirements.
- All required price fields are included for each marketplace.
