REGISTRATION

SP-API Registration Overview >

Vendor Direct Fulfillment Orders API

Direct Fulfillment customer data transmission

Amazon label only vendors do not receive customer data such as name, address, or phone number for some orders returned using the `getOrder` and `getOrders` operations. Direct Fulfillment shares customer information directly on Amazon provided shipping labels. This applies to all shipments fulfilled by Amazon label only vendors and [Amazon Transportation Services-Small Parcel](#). Customer ship-to details are only returned for Vendor Own Label (VOL) or Vendor Own Carrier (VOC).

Customer name, address, and phone number are available if your operations require you to generate a label using a Direct Fulfillment Amazon carrier account. The information is also available to you if you use a vendor own label (VOL) or vendor own carrier (VOC) shipping label to fulfill the Direct Fulfillment order. If you generate your own AMXL shipping labels, you can access customer data.

★ Tip

If you use AMXL and AT shipping methods for the same warehouse, the `AMXL 0versize` and `XL` markers on the label help differentiate between AMXL and AT labels.

Use cases

The following use case examples are available for the Vendor Direct Fulfillment Orders API:

- [Get a list of orders](#): Get a list of order references or complete order details.
