Welcome to SP-API Documentation

What is the Selling Partner API?

Selling Partner API Onboarding Overview

View your Application Information and Credentials

Learn how to view your application information and credentials.

After you [register your application](#) you can view information about your application, as well as your Login with Amazon (LWA) credentials. The way you view this information varies slightly depending on the application type. For the purposes of viewing your application information and credentials, applications are grouped into two types:

- **All public applications and private seller applications.** These are: (1) Applications that

Terminology

Frequently Asked Questions >

are publicly available and are authorized by a seller or by a vendor, and (2) seller applications that are available only to your organization, and are self-authorized.

- **Private vendor applications.**

Vendor applications that are available only to your organization, and are self-authorized.

For more information, refer to [Terminology](#).

REGISTRATION

SP-API Registration Overview >

The following procedure demonstrates how to view your application information and credentials.

Developer Registration Request Status

Third-Party Provider Registration >

1. Sign in to the [Solution Provider Portal](#) using your developer credentials.

Service Provider Registration and Role Approval Process Overview

Website Guidelines for Public Developers and Service Providers

2. On the top navigation, select **Develop Apps**.

User Permissions for Service Providers

Register your Application

Update your Application Information

Rotate your Application's LWA Credentials >

3. On the Developer Central page, find the application you want to update. Choose **Edit app**.
